

Srinivasa Ramanujan Magic Square (formula)

Patel Akshay Zaverbhai

S.Ramanujan Magic Square is a matrix of numbers like date of birth, month and year or century in which every row, column and diagonal adds-up to the same number. A square with many distinct integers placed in such a way that the sum or total of the numbers is the same in every row, column, and main diagonal, as well as typically on some or all of the other diagonals, is known as a magic square.

S.Ramanujan loved to play with Mathematics or numbers. so he made or discovered many theorems and theories in career (life). But he does not prove his discovery because he has no knowledge about the education curriculum taught in the university. But he believes that his invention (work) always gives the right result and it has been proven many time by others in his career or after his death. So his works were collected and analyzed all over the world so that his work became known and preserved as the "LOST NOTEBOOK".

22	12	18	87
88	17	09	25
10	24	89	16
19	86	23	11

Ramanujan magic square

DD	MM	CC	YY
YY+1	CC-1	MM-3	DD+1
MM-2	DD+2	YY+2	CC-2
CC+1	YY-1	DD+1	MM-1

Here,

DD = Date of birth.(22),

MM = Month of birth.(12),

CC = Century of birth.(18),

YY = Year of birth.(87).

The Great Indian Mathematician S.Ramanujan was also an astrologer?

Magic square (formula) helpful & useful to calculate or predict age, life, date of death?

Magic square related with Astrology, Vedic Math, Number or Conversion series (theory)?

The Genius Mathematician **S.Ramanujan's Magic Square (Formula)** predict or calculate Age, Life, DATE OF DEATH and also related with Astrology, Vedic math, Number-Conversion Series (Theory) ?

Srinivasa Ramanujan's magic square in museum's photo

In this museum photo's we see the 4*4 Magic square who stands out the most different. And different analysis can be done it.

Museum photo's MAGIC SQUARE					MAGIC SQUARE FORMULA				
A	B	C	D	TOTAL	DATE	MONTH	CENTURY	YEAR	TOTAL
22	12	18	87	139	A	B	C	D	A + B + C + D =
21	84	32	2	139	C+3	D-3	A+10	B-10	
92	16	7	24	139	D+5	C-2	B-5	A+2	
4	27	82	26	139	B-8	A+5	D-5	C+8	
139	139	139	139	139	A+B+C+D=				139

So
 column A = Date of birth. (22),
 column B = Month of birth. (12),
 column C = Century of birth. (18),
 column D = Year of birth. (87).

If $A+B+C+D=0$

or

$A+B+C+D=139$

Then column A day/date =22 (A=day/date never minus)

$A=B+C+D$ $=21+92+4$ $=117$ day/date

or

Jan 31 + Feb 28 + Mar 31 + Apr 26
 $=116$ day/date $=116$ th day over 117th day start $=26$ Apr

or

In column A $=$ ~ 30 day/date in one month
 $=$ -4 (139-22-21-92 = value of B or value of A, C & D is zero)
 $=$ 26th days/date

Then column B month =12 (A=day/date never column B)

$A=139-B-C-D$ $=139-84-16-12$ $=27$ month $=12$ month+12 month+3 month
 $=2$ year 3 month over

or

If A=day/date=? B=12 (value of C & D is zero)
 $=139-B-C-D$ $=139-12-0-0$ $=127$ day/date $=26$ Apr

or

Dec (22 to 31)10+ Jan 31 + Feb 28 + Mar 31 + Apr 26
 $=126$ th day over 127th day start $=26$ Apr

Then column C century or D year

Day	Month	Year	Century
0	0	0	0
1	0 or 1	0	0
$\sim 28, 29, 30$ or 31	=1	0	0
~ 365 or 365+1	=12	=1	0
~ 365 or 365+1 day <u>OR</u> 12 month		+ 99	=1

column C=century $=100-(A=32)$ $=68$ $=D$ (C or B is zero)

column D=year $=100-(B=2)$ $=98$ $=C$ (A or D is zero)
 $C-D=98-68=30$ year

or

(value of A & B is zero)

column C=century=18 D=? $C+D=139$ $18+D=139$ $D=139-18=121-99$ (year) **D=22 year**
 column D=year=87 $C=?$ $C+D=139$ $C+87=139$ $C=139-87$ **C=52 year**
 $C-D=52-22=30$ year

column D-C or C-D	30 year
column B	A=27 month =2 year 3 month
column A	B=4 day so A=26 day/date

LIFE=column(D-C+B+A)	32 year 3 month over 26 day =26 Apr 1920=date of death
----------------------	--

Ramanujan born on 22 December 1887 into a Hindu Brahmin family in Tamilnadu. His mother Komalatammal had arrived a dream in which the family deity known as Namagiridevi commanded her to "no longer stand between her son and the fulfilment of his life's purpose". So the mother allowed Ramanujan to cross the ocean to England for his mathematical studies and research work.

Ramanujan's parents were childless for many years. They would often go to 'Namagiri Lakshmi Narasimhaswami Temple'. Narsimha the fourth reincarnation of Lord Vishnu & Husband of Namagiridevi and who also family deity of Ramanujan's family. So they prayed for a child in their family. It is said that Namagiridevi told in Ramanujan's mother in her dreams that, she would speak through her son one day.

In the first three years of birth, Ramanujan scarcely spoke. He was a talented Mathematician who was selftaught from childhood and he could calculate faster than a calculator or many time he was did math calculation without use of calculator. But One day when he was in class 3, his teacher was explaining that a number divided by itself equals one. He explained, if you distribute 3 mangoes amongst 3 persons then each will get one. Ramanujan questioned, **'Is zero divided by zero also one. If no mangoes are distributed among any one - will still each get one?'**

This event was repeated many times in Ramanujan's life. Ramanujan used to say that Namagiridevi helps him on the numbers, the results, the theorems and he would say, **"An equation for me has no meaning, unless it expresses a thought of God"**.

He believed that mathematics is everywhere in everything. And he also believed that God (Nature) is also a great mathematician and that Nature always follows fixed Math patterns.

While asleep, I had an unusual experience. There was a red screen formed by flowing blood, as it were. I was observing it. Suddenly a hand began to write on the screen. I became all attention. That hand wrote a number of elliptic integrals. They stuck to my mind. As soon as I woke up, I committed them to writing.

"Have not trodden through the conventional regular course which is followed in a university course, but I am striking out a new path for myself".

Ramanujan's mother Komalatammal believe so much in astrology. According to her, Ramanujan's stars predicted that either, He would be famous but his life would be too short or He would live his full life like an ordinary man. Ramanujan returned to India from England in 1918 and died shortly thereafter on 26 April 1920 at the young age of 32 year 4 month 4 day. The Government of India has declared his birth date (22nd December) as **"The National Mathematics Day"**. On this occasion, this is a tribute to this great genius mathematician.

"THE MAN WHO KNOW INFINITY"
